

Knitlock

The Frister family has a proud heritage of professional sewing machines. Patented and manufactured to the highest standard – this is what reliable sewing is all about.

The best sewing and overlocking is done on a
frister+rossmann – naturally

Knitlock

This quality overlocker from frister+rossmann has been styled and designed primarily for reliability and ease of use. Threading is straightforward, the cutter swings away for safe easy cleaning and threading. Disengage the top cutting blade for decorative and creative overlocking. A professional finish is easily achieved using the Knitlock. Convenient "lay in" tensions units for easy threading - Versatile: use as a two, three or four thread overlocker - Differential feed for smooth waver free and pucker free seams on knitwear and sheer fabrics - Full control with the foot pressure regulator - Variable stitch width and length using easy to access control dials - Lint tray to keep your work area clean - Sewing light for use in difficult lighting conditions - Dust cover to keep your overlocker clean and ready to use.

"Lay In" Tension Unit

Easy to thread "lay in" style tension units with automatic tension release. Simply lifting the presser foot releases the thread tension allowing each thread to be pulled through.

Easy Threading

The unique cutting system opens up 180 degrees to giving easy access to the looper thread guides. Threading is quick and easy with no need for tweezers or specialist tools.

Tool Storage

Keep your lint brush, needles, screwdriver, etc always to hand in the integrated storage compartment behind the door.

Threading Chart

The colour coded threading guide clearly shows each thread path ensuring that your overlocker is threaded correctly.

Differential Feed

The Knitlock has dual feeds which can be adjusted independently to help manage difficult and extreme fabrics. These feed dogs will cope with stretch fabrics effortlessly and evenly feed fine fabrics to give a pucker free finish.

Precision Engineering

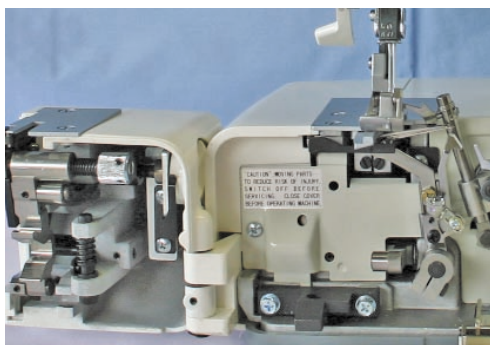

Years of research and development have been invested to develop the Knitlock and achieve a standard of engineering that makes it one of the most reliable overlockers on the market.

List of Main Features

- 4 thread ● Use with 2, 3 or 4 threads
- Differential feed ● Unique "Swing Away" cutter for easy threading and cleaning
- Easy to follow colour coded threading ● Quick change rolled hem
- Adjustable foot pressure ● Clip on presser feet ● Integrated thread cutter
- Waste tray ● Dust cover

Standard Accessories

- Cone holder (4) ● Thread nets (4)
- Spool caps (4) ● Lint brush
- Lint tray ● Needle set ● Oil
- Dust cover

Specifications

No. of Threads	4
Thread Options	2 or 3 or 4
Tension Units	Lay in Auto Release
Differential Feed	Yes
Adjustable Stitch Length	Yes
Adjustable Stitch Width	Yes
Stitch Length Setting	1mm - 5mm
Stitch Width Setting	4mm - 7mm
Presser Foot Pressure	Adjustable
Retractable Moving Knife	Yes
Needle Threader	Yes
Cover	Yes
Lint Collector	Yes
Accessory Storage	Yes
Integrated Thread Cutter	Yes
Integrated Handle	Yes
Motor	AC 120 Watt
Maximum Stitch Per Minute	1300
Sewing Light	Built in 15 Watt
Presser Foot System	Snap on
Weight (kg)	8
Dimensions (mm)	320 (w) 280 (d) 280 (h)
